DATE MAILED: 04/13/2004

Please find below and/or attached an Office communication concerning this application or proceeding.

the correction is required if the
to by the Examiner. Note the attached O

Art Unit: 1732

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Drawings

2. The drawings are objected to because transparent plate 11 and holder 12 are not shown in the drawings. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

3. The disclosure is objected to because of the following informalities: Appropriate headings should be used throughout the instant specification. All references to the claims (on pages 1 and 2 of the instant specification) should be deleted. On page 6, line 5, ``2" should be - - 21 - - .

Appropriate correction is required.

4. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: The instant specification does not provide clear and antecedent basis for the subject matter of instant claim 15.

Art Unit: 1732

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 13, 16, 24 and 25 are rejected under 35 U.S.C. 102(e) as being anticipated by Young, Jr. (U.S. Patent 5,922,364).

Art Unit: 1732

Young, Jr. (see the entire document, in particular, col. 12, lines 3-6 and 50-57; col. 13, lines 48-55; Figure 1) teach a process of making a three-dimensional object (by stereolithography) as set forth in the instant claims, including the steps of providing a mask-generating device, generating a mask and controlling radiation intensity (by changing the characteristics of the mask). Young, Jr. also teach an apparatus for making a three-dimensional object (by stereolithography) as set forth in the instant claims, including a radiation source (which can generate visible light), a platform, an applicator device, a mask-generating device and a control device.

Allowable Subject Matter

7. Claims 14, 15, 17-23 and 26-29 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Leo B. Tentoni whose telephone number is (571) 272-1209. The examiner can normally be reached on Monday - Friday (6:30 A.M. - 3:00 P.M.).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael P. Colaianni can be reached on (571) 272-1196. The fax phone number for the
